

LIGHTING OPTIONS T-5 FLUORESCENT

ARIZON'S T-5 HANG LIGHT SYSTEM

Arizon's T-5 high efficiency lighting system is an affordable upgrade from traditional systems. Unlike metal halides that are prone to discoloration, require several minutes to start up, and typically produce 75% light efficiency, Arizon's T-5 system offers long-lasting light that is evenly distributed throughout the entire facility for an attractive, aesthetically pleasing environment. This system also significantly reduces energy consumption and overall operating costs by using less energy to operate.

TECHNICAL SPECS:

WATTAGE	696 W
INPUT CURRENT (AMPS)	2.51 Amps @ 277V
INITIAL LUMENS	37,440
FIXTURE EFFICIENCY	91%
DEPRECIATION	4%
SOUND RATING	A
NON PASSIVE FAILURE	No
INSTANT ON/OFF	Yes
HOUR RATING	25,000
POWER FACTOR	Greater than 98%
COLOR RENDERING INDEX	85
FIXTURE WEIGHT	26 lbs

ASK ABOUT RETRACTABLE LIGHTING

Hang light systems are most frequently used in air-supported buildings, as they provide the most efficient way to evenly illuminate large, open-span spaces using indirect lighting. Arizon is now offering retractable lighting systems to make maintaining the suspended fixtures easy, enabling dome owners to lower each fixture individually to either change, repair, or replace fixtures without a scissor lift or any additional equipment.

HOUSING

20GA (0.032") PRE-PAINTED ALUMINUM DIE FORMED WITH SUFFICIENT KNOCKOUTS FOR MOUNTING & ELECTRICAL SUPPLY.

FINISH

ALL PARTS ARE PAINTED WITH A SMOOTH, GLOSSY, HIGHLY-REFLECTIVE WHITE PAINT.

CONSTRUCTION

THE SOLID BODY PROVIDES ADDED RIGIDITY. THE REFLECTORS ATTACH WITH QUARTER-TURN FASTENERS. NO TOOLS ARE REQUIRED FOR REFLECTOR INSTALLATION & REMOVAL.

REFLECTOR

CAN BE ORDERED WITH A 95% SPECULAR 92% DIFFUSE WHITE ENAMEL. SUBSTRATE IS 0.020" HIGH QUALITY ALUMINUM. THE REFLECTOR PROFILE IS OPTIMIZED USING COMPUTER ANALYSIS & MANUFACTURED USING CNC EQUIPMENT. A PROTECTIVE PREMASK IS APPLIED TO ALL REFLECTIVE SURFACES.

MOUNTING

FIXTURE IS DESIGNED FOR SUSPENDED APPLICATIONS IN AIR DOMES.
