ATTACHED TO CONVENTIONAL BUILDING  
CUSTOM BRANDED BANNER

Two Rivers Activity Center (TRAC) is a public recreation center designed to offer residents and local schools access to indoor activities in Jamestown, ND. As part of its design, TRAC was planned with an Arizon air-supported dome to enclose a multisport indoor turf field and tennis courts. The wide, column-free spans, tall ceiling heights, and rapid construction of an Arizon air-supported dome makes it the perfect complement to the project as a whole. Additionally, TRAC worked with Arizon's team to include its logo and artwork on the building's exterior by utilizing premium commercial signage products with extended durability.
