

# CASE STUDY AQUATICS

## [ LAKES GOLF & COUNTRY CLUB ] WESTERVILLE, OH

APPLICATION:.....AQUATICS FACILITY  
SIZE:.....75'W x 102'L x 24'H  
FEATURES:.....SEASONAL STRUCTURE  
CUSTOM FRAME ACCESS TUNNEL  
POLE LIGHT SYSTEM

### CHALLENGE

- Arizon Building Systems was tasked to build a seasonal air-supported building to cover the pool at The Lakes Golf & Country Club.
- The management team with The Lakes Golf & Country Club also wanted to have a covered walkway from the restrooms and concession area, which were located one level above the pool, to the pool dome.

### SOLUTION

- Arizon constructed the dome with thermal liner insulation, a pole light system, and to be able to be dismantled for seasonal use.
- A fabric frame walkway was also designed by Arizon to cover the stairwell leading from the concession area and restrooms to the fabric building with a revolving door as the entrance.

### RESULT

- Lakes Golf & Country Club members can now enjoy swimming all year round with the Arizon dome.
- Members also remain covered at all times coming to and from the dome because of the frame walkway Arizon provided.
